	Application No.	Applicant(s)
	09/715,811	JACOBSEN ET AL.
Notice of Allowability	Examiner	Art Unit
	KHAI TRAN	2637
The MAILING DATE of this communication appear All claims being allowable, PROSECUTION ON THE MERITS IS (herewith (or previously mailed), a Notice of Allowance (PTOL-85) of NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RICE of the Office or upon petition by the applicant. See 37 CFR 1.313	ars on the cover sheet w. OR REMAINS) CLOSED in other appropriate commendates. This application is	ith the correspondence address n this application. If not included unication will be mailed in due course. THIS
1. This communication is responsive to the amendment filed 11/22/2004.		
2. The allowed claim(s) is/are <u>1-22</u> .		
3. The drawings filed on <u>17 November 2000</u> are accepted by the Examiner.		
4.		
Attachment(s) 1. Notice of References Cited (PTO-892) 2. Notice of Draftperson's Patent Drawing Review (PTO-948) 3. Information Disclosure Statements (PTO-1449 or PTO/SB/08 Paper No./Mail Date 4. Examiner's Comment Regarding Requirement for Deposit of Biological Material	6. ☐ Interview S Paper No. 7. ☐ Examiner's	nformal Patent Application (PTO-152) Summary (PTO-413), /Mail Date S Amendment/Comment S Statement of Reasons for Allowance

Art Unit: 2637

REASONS FOR ALLOWANCE

1. The amendment filed 11/02/2004 has been entered. Claims 1-22 are pending in this Office action.

Allowable Subject Matter

- 2. Claims 1-22 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: Tate et al fail to disclose a method of upstream power back-off in a broadband communication system comprising: a network terminate interface enabling determination of an upstream transmit power spectral density prior to upstream data transmission using the transmit GDR PSD; and management interface enabling operator configuration of the GDR PSD as recited in claims 1 and 12; and at least two transmission loops of differing lengths, the method comprising: the network termination type interface further enabling determination of an upstream transmit power spectral density defined as:

$$S(f) = \frac{L_r S_{ADR}(f)}{L_i |H(f)|^2},$$

where L_i is a determined length of a transmission loop associated with the network termination type interface, $H(f)^2$ is an estimated insertion loss of the associated transmission loop, and $S_{GDR}(f)$ represents the GDR PSD defined as:

Application/Control Number: 09/715,811

Art Unit: 2637

where $\eta(f)$ is an assumed reference noise profile, L_r is a nominal loop length, and K_{FEXT} is a constant representing the coupling from a first loop to an adjacent loop in communication system.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to KHAI TRAN whose telephone number is (571) 272-3019. The examiner can normally be reached on 7:00AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAY PATEL can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
